
The Seven Organizational Competency Areas

Seven organizational competency areas have been identified and validated as being key to organizational success:

- 1** Visionary leadership: Collaborative leadership to reach the shared vision
- 2** Communication: Dynamic process grounded in respect for diverse voices
- 3** Information management: Using technology to manage the transfer of information to end-users
- 4** Assessment, planning, and evaluation: The continuous quality improvement cycle
- 5** Partnership and collaboration: Optimizing performance through shared resources and responsibility
- 6** Systems thinking: Future-oriented problem solving and decision making
- 7** Promoting health and preventing disease: Putting the science and art of public health into action, which absolutely requires the support of these competency areas

What other knowledge, skills, and abilities are part of your organization's core competence?
